Dear FCC:

I really cannot afford a wireless phone and service however, in this day and age, I felt it was a necessity. I use my phone for emergencies and currently use what I considered to be the cheapest option available. Any increase in rates would hurt the many people like me who feel the need to carry these phones for emergencies only.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,
